Adapt11 Twin Backplane/Adapter

USD \$4.00

Click on image to open product gallery

Product Info

Mini backplane has receptacles to accept any two Adapt11-style cards (with either SB or RA connector options). The two-card assembly can then be plugged into a solderless breadboard. Use it to implement your own display or interface card built on an Adapt11 Prototyping Card. Can also be used with Adapt9S12C and Adapt9S12ZVC modules.
