Adapt11 OEM Module

USD \$59.00

Product Info

- Compact form factor (1.7" x 2.8")
- 8 MHz crystal (2 MHz bus speed)
- Selector switch for Single-chip/Expanded Mode operation
- Compatible with 12K or 20K OTP ROM versions of the 68HC11 (i.e. 68711E9 and 68711E20) but cannot program them (use Adapt11EVBU instead)
- Works with any 68HC11 A or E series microcontroller supplied in a 52-pin PLCC package
- On-board reset circuit and button, 5V regulator, and RS232 interface
- All port pins are brought out to standard 50-pin connector pattern
- 11 [connector options](#) for the ultimate in [modular design](#) capabilities
- Accessories and application boards available
- in production since 1995, and still in demand!

What you get:

- this is an OEM product so no hardcopy data is provided
- data sheets, manuals, and all other resources for this product can be found by clicking on the Resources tab above
- the 68HC11 microcontroller chip is not included; buy it separately from vendors such as Newark, DigiKey, Mouser, etc.
