Raspberry Pi cable/adaptor set

USD \$5.00

- brings out the GPIO signals from the Raspberry Pi single-board computer to a solderless breadboard for easy interfacing
- includes 6-inch (15cm) 26-conductor ribbon cable (#RC26FF6) and a 26-pin ribbon cable-to-solderless breadboard adapter (#ADIDC26-M)
- no soldering required-- just "plug and play"

Printable datasheet available [here](#).

Note: for low-cost airmail shipping (non-trackable), select *SmallPacketAir* as your shipping method during Checkout (ignore estimated delivery date). It costs between \$8 and \$10 and takes from 1 to 3 weeks, on average, depending on destination. Save shipping-- combine your order with a friend's for the same shipping cost in most cases!
