App Cards

Diff Amp Module, 8-channel
USD \$199.00

Designed for precision buffering and amplification of analog signals derived from various sensors, the outputs of this board can be connected directly to MCU analog inputs. [\[Product Details...\]](#)

Display/Kbrd/Keypad Interface, 20x4 backlit LCD, rear-facing
USD \$15.00

Multi-feature user interface board with 4-line 20-character back-lit LCD [\[Product Details...\]](#)

Servo/Sensor/Motor Interface Board for NanoCore12DX
USD \$129.00

Application board for use with NanoCore12DX, geared to mechatronics and robotics. [\[Product Details...\]](#)
