Adapt12 Solderless Proto Card for H2

USD \$15.00

Product Info

- solderless breadboard section designed for rapid prototyping or training
- plugs onto H2 of any Adapt12 or Adapt9S12 MCU card having a right angle connector, forming a planar configuration
- mounting holes for #4 hardware, shown (hardware not included)
- specify FRA1 [connector option](#) to mate with an MCU card with RA1 connector
- specify FRA [connector option](#) to mate with an MCU card with RA connector

Important!Â the header has a *mirror-image* pinout, which means it is only suitable for planar configurations (i.e. not stackable)
