Adapt9S12 Prototyping Card

USD \$5.00

[Product Info](#)

Adapt9S Prototyping Card

- designed to be used in stackable or backplane configurations with any Adapt9S family MCU card
- redundant connector position for each of P1 and P2 for easy signal access
- sea of plated-through holes on a 0.1" grid for easy soldering of standard components
- choose connector option for P1 and P2 to mate with H1 and H2 on your MCU module

Note:Â this card is not mechanically compatible with original Adapt12 family
