## 1x16 Housing (Pack of 5)

USD \$4.50

These popular Dupont housings accept pre-crimped wires having female or male crimps on them, making it a snap to put together custom cable assemblies! The female crimps mate with standard 0.025" square pin headers, making it easy to pick off signals. The male crimps will plug into standard solderless breadboards, making it quick and easy to whip up a circuit. Purchase the pre-crimped wires separately, along with any quantity and configuration of housings you require.
