Technological Arts

header, dual row, pass-thru, 50-pin

USD \$5.00

This is the header we use for the -FM and -FM1 connector options on our Adapt-series MCU, application, and accessories products. It is a quality stackable header at about half the price of the Samtec part we used to use. Unlike the stackable headers commonly used with Arduino, these pins are square (not rectangular).

- two rows of 25 positions
- 0.1-inch (2.54mm) centers
- 0.025-inch (0.64mm) square pins
- high-temperature black plastic receptacle
- gold-plated contacts and pins
